

FREIGHTFLEX C A R G O
DELIVERING EXCELLENCE

INTRODUCTION

Freightflex Cargo Logistics is an India Logistics company headquartered in Greater Noida is one of the reliable and trusted logistics company having its network across India dedicated to provide transportation service in Air, Rail & Surface Express mode to Businesses. As a leading transport and logistics company in India, established in 2024, we are dedicated to delivering high-quality, end-to-end logistics solutions tailored for corporate clients..

Founded with a commitment to excellence, Freightflex Cargo provides top-tier logistics solutions tailored to meet the specific needs of our clients. We specialize in seamless and efficient transportation services, ensuring reliability and trust in every delivery. Our values include a strong emphasis on quality, innovation, and ethical practices, all while maintaining a human-centered approach. At Freightflex, we believe in building lasting relationships through passion, reliability, and visionary thinking, making us your trusted partner in cargo transportation.

Road Freight

Road freight services provide a crucial link in the supply chain, offering reliable and flexible transportation solutions for goods of all types. Our road freight services cater to a wide range of needs, from local deliveries within a city shipments. We pride ourselves on timely deliveries, cost-effective solutions, and a commitment to safety and compliance. Our fleet of modern vehicles, equipped with the latest technology, ensures efficient and secure handling of your cargo. Whether you need specialized transport for temperature-sensitive goods or a straightforward delivery, our road freight services are designed to meet your logistics needs with precision and care.

- FTL Service
- ODC Service
- PTL Service

Air Freight

Air freight services offer a fast and efficient solution for transporting goods across long distances, making them an essential component of global logistics.

Benefits

- Freightflex Cargo emphasize your commitment to punctuality and reliability. 24 Hrs Direct line haul services to All destinations
- Highlight how your services are cost-effective compared to alternatives.
- Detail the measures in place to ensure cargo safety and regulatory compliance.

Rail Freight

Rail freight services play a vital role in the efficient movement of goods across long distances, offering a reliable and cost-effective alternative to road transport. With the capacity to handle large volumes of cargo, rail freight is particularly well-suited for bulk shipments, heavy machinery, and other industrial goods. The stability and predictability of rail schedules ensure timely deliveries, while the lower carbon footprint of rail transport makes it an environmentally friendly option. Our rail freight services are designed to seamlessly integrate with other logistics solutions, providing a comprehensive and sustainable approach to supply chain management. Whether transporting goods domestically or across borders, rail freight offers a secure, efficient, and scalable solution for businesses of all sizes.

FTL Service

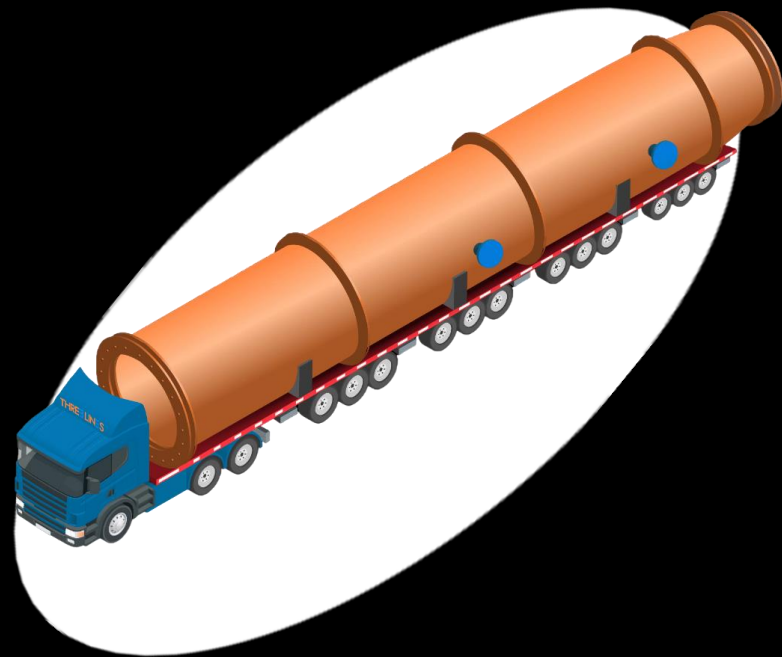

Full Truckload (FTL) service is a premier shipping option for businesses that need to move large quantities of goods in a single, dedicated shipment. With FTL, the entire truck is reserved exclusively for one client's cargo, ensuring that the shipment travels directly from the pickup point to the destination without any stops or transfers. This minimizes the risk of damage, reduces transit time, and provides greater security for high-value or sensitive goods.

ODC Service

Over Dimensional Cargo (ODC) service specializes in the transportation of oversized or heavy loads that exceed the standard dimensions and weight limits for regular freight. These include large machinery, construction equipment, wind turbine components, and other bulky items that require special handling and transport arrangements. ODC transport involves meticulous planning, including route surveys, securing the necessary permits, and coordinating with local authorities to ensure safe passage.

PTL / LTL Service

Partial Truckload (PTL) service is an efficient and cost-effective shipping solution for businesses that need to transport goods that don't require a full truck but are too large for less-than-truckload (LTL) shipping. PTL allows multiple shipments to share space in a single truck, optimizing costs while ensuring quicker transit times compared to traditional LTL services. This service is ideal for mid-sized shipments that benefit from reduced handling and fewer stops, minimizing the risk of damage and delays. Our PTL service provides flexible and reliable transportation, ensuring your cargo is delivered safely and efficiently, with the added advantage of cost savings and greater control over your shipment's journey.
